

LOSING A TOOTH!

Losing a tooth is something
that happens to everyone.

People usually lose teeth when they are children.

This is because people are born with “baby teeth”. Once we lose the baby teeth, adult teeth grow in!

First, the tooth gets a little loose and it can be wiggled.

Then, the tooth gets very loose and wiggles a lot.

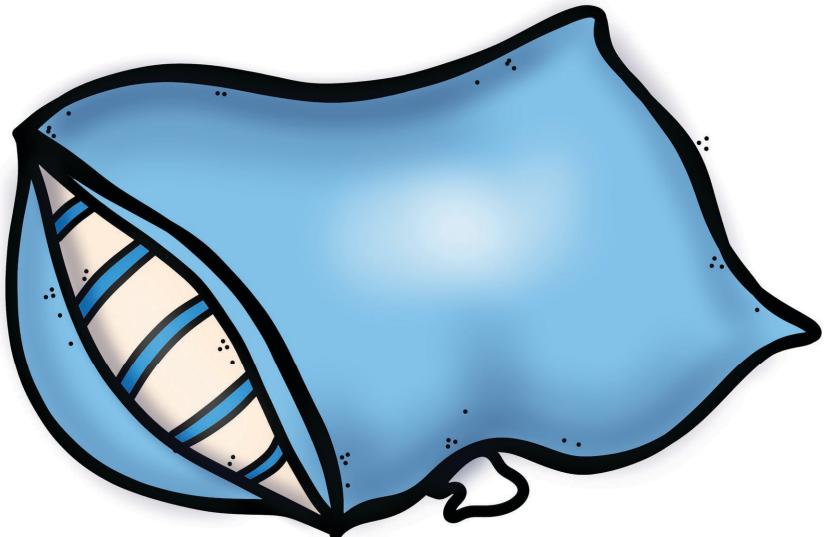

Next, the tooth will fall out.

There is usually a little blood when
the tooth falls out. It's okay!

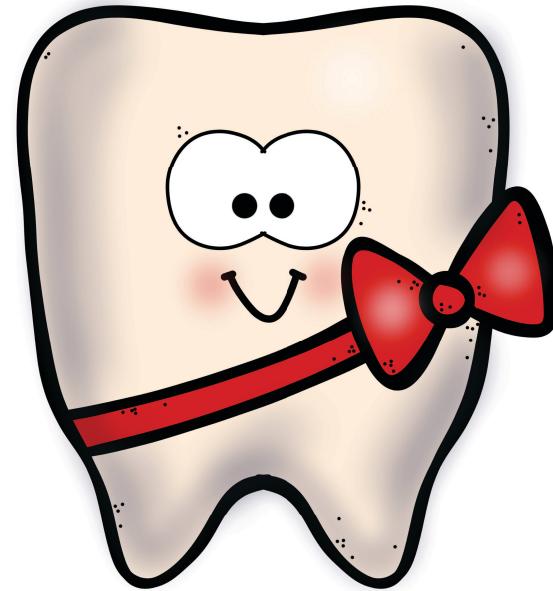

After the tooth falls out, my parents will help me.

My parents might help put my tooth under my pillow or in a special place for the tooth fairy.

Then, the tooth fairy will come
and leave me a little gift!

Losing a tooth might make me
feel worried, but it will be okay!
